Technical Skills

Languages & Frameworks: React Native, JavaScript (ES6+), TypeScript, React

Native Mobile: Swift, SwiftUI, iOS, Xcode

Expo: Expo (Managed & Bare Workflow, EAS Build/Submit, EAS Update)

State & Data Management: Redux, Redux Toolkit, Zustand, Context API, TanStack Query

APIs: REST APIs, Axios

Tools & Services: Git, GitHub, Firebase, Twilio, Stripe, Jira

Professional Experience

TMA Solutions

Apr 2025 – Present

Mobile Developer

Ho Chi Minh City

- Developed and maintained a cloud-based business communication application using React Native, TypeScript, and Expo, covering call management, messaging, and AI-powered agent workflows.
- Optimized application performance through caching strategies, offline data handling, and large list rendering, reducing unnecessary re-renders and improving overall responsiveness.
- Integrated Twilio, Stripe, and OAuth 2.0-based SSO for voice communication, payments, and authentication, while handling REST APIs and asynchronous application workflows.
- Implemented real-time communication features, including push notifications, chat, and voice calls, handling asynchronous events and state transitions across different call states.
- Collaborated with QA to investigate and resolve customer-reported issues, reproducing bugs and delivering timely fixes to improve application stability and user experience.
- Managed application releases and deployments to the App Store and Google Play, including versioning, release coordination, and production issue resolution.

Affina

Apr 2024 – Sep 2024

Mobile Developer

Ho Chi Minh City

- Developed features for a mobile insurance marketplace using React Native based on product requirements and Figma designs.
- Built reusable UI components and application flows for insurance-related features.
- Integrated REST APIs, handling asynchronous data, loading states, errors, and application state.
- Collaborated with QA to reproduce and resolve bugs, ensuring consistent functionality across iOS and Android platforms.
- Refactored and optimized React Native components to improve maintainability.

Projects

Pulse – Native iOS Tracking App

Swift, SwiftUI, MapKit, Core Location

Personal Project

- * Developing a native iOS tracking application using **Swift** and **SwiftUI**, focusing on real-time location tracking and map-based navigation.
- * Implemented real-time location and heading updates using **Core Location**, handling authorization states and continuous location updates for navigation scenarios.
- * Built map-based tracking features with **MapKit**, including user location, route visualization, annotations, and programmatic camera control.
- * Designed custom navigation camera behavior to keep the user in focus while dynamically adjusting **heading, pitch, and distance** based on navigation state.

Education

Ton Duc Thang University (TDTU)

Bachelor of Science in Computer Science

2020 – 2024

Ho Chi Minh City
